

Certificate of Course Participation

I hereby certify that

Mrs. Brisa Bøhle

has attended the **Fologram Augmented Vision Workshop** on September 7th through September 9th, 2022 at our Barcelona offices.

The workshop was taught by the **Fologram team** Gwyllim Jahn, Cameron Newnham, and Nick van den Berg, and was organised by **McNeel Europe**. Participants learned how to create **custom mixed reality applications for design and fabrication** using Rhino, the Grasshopper and Fologram toolkits, and the HoloLens 2. Furthermore, 1:1 prototypes were used as demonstrators to gain awareness of the unique advantages of mixed reality for the fabrication of complex design models. Thus, participants came away from the workshop with a better understanding of the new fabrication capabilities and how these might impact the feasibility of certain designs. During the workshop, the HoloLens 2/ research mode and internal builds of the **Fologram software** were available to experiment with features not yet available in public apps.

The **Fologram Augmented Vision Workshop** covered 24 hours.

Barcelona, October 11th 2022

Dr.-Ing. Verena Vogler

Training and R&D department at McNeel Europe
